Problem & Solution

The Problem Statement

Sri Lankan rentals are managed through WhatsApp, calls, bank slips, paper agreements and memory. This causes missed rent records, unclear repair responsibility, delayed maintenance, weak proof, deposit disputes and lower trust between tenants and landlords.

Application Blueprint

RentLoop is a double-sided rental operating platform for tenants and landlords. It manages rental agreements, rent due reminders, payment proof, digital receipts, maintenance tickets, move-in/move-out evidence, renewal reminders and verified rental history. Tenants can start alone and invite landlords later; when both sides join, the app becomes a shared trusted rental portal.

Innovation & Technical Design

Agentic AI Intergration

Our AI is not just a chatbot. It acts as a rental checklist assistant that helps tenants and landlords manage important rental workflows.

- Checks whether all key property areas are inspected before move-in
- Detects visible issues from photos such as cracks, leaks, mold, stains, and damaged fittings
- Extracts key rental agreement details such as rent amount, due date, deposit, notice period, and repair responsibilities
- Matches rent payment proofs with monthly rent records
- Organizes maintenance issues, landlord responses, photos, and repair updates into a clear timeline

This creates value for both sides: tenants get better protection, while landlords get clear property, payment, and maintenance records.

Technical Architecture & Feasibility

Mobile: React Native / Flutter. Web: React / Next.js. Backend: Node.js/NestJS or Ballerina APIs. Database: PostgreSQL/Supabase. Storage: encrypted documents/photos. AI: OCR + LLM + image analysis. Payments: manual bank-slip proof first; later PayHere / JustPay / LankaQR. Security: role-based access and audit logs.

Market Potential & Sustainability

Market Potential & Sustainability

Target users: tenants, annex/boarding tenants, students, young professionals, small landlords, owners with multiple rental units and small property managers. The app is useful every month because rent, receipts, repairs, utility records, renewals and move-out checks repeat throughout the rental period.

Sustainability & Long- Term Impact

Long-term growth comes from landlord subscriptions, premium tenant protection reports, payment convenience fees and maintenance-service commissions. The platform can later expand into verified rental reviews, technician marketplace, commercial rentals, student housing and property-manager tools.

IDEALIZE 2026 - Team Proposal

Revenue Model & Landlord Value

Landlord value

- Automatic rent reminders and arrears view
- Digital receipts and tenant ledger
- Maintenance tickets with photos and status
- Lease, deposit and renewal reminders
- Move-in/move-out condition proof
- Income, expense and property reports

Revenue streams

- Landlord subscription per unit/property
- Small payment convenience fee for connected payments
- One-time tenant AI contract / scam / evidence reports
- Maintenance worker or vendor commission
- Verified listing and tenant onboarding tools later

IDEALIZE 2026 - Team Proposal

MVP Roadmap & Retention Loop

MVP phase

- Phase 1: Tenant app — rental profile, lease upload, rent reminders, proof uploads and maintenance log
- Phase 2: Landlord dashboard — properties, tenants, ledgers, receipts and repair tickets
- Phase 3: AI agents — contract summary, payment matching, maintenance triage and message generation
- Phase 4: Payments + technician marketplace

Retention loop

- Contract creates reminders
- Monthly rent creates repeated usage
- Payment proof creates trusted records
- Maintenance creates shared workflow
- Evidence protects both sides
- Reviews build credibility
- Next rental starts inside RentLoop again

IDEALIZE 2026 - Team Proposal

Feature Table

feature	Tenant value	Landlord value
Rental profile & agreement upload	Keeps all rental details in one place	Stores tenant, lease and property records
Rent reminders & payment proof	Avoids missed payments and keeps proof	Tracks paid, pending and late rent
Digital receipts & rent ledger	Prevents payment disputes	Reduces manual receipt handling
Move-in / move-out checklist	Protects deposit with evidence	Protects property from false damage claims
Maintenance tickets	Reports issues clearly with photos	Tracks repairs, approvals and costs
AI rental checklist assistant	Finds missed checks, visible issues and contract obligations	Creates clear property, payment and maintenance records
Verified rental history & reviews	Helps future tenants choose safer rentals	Builds landlord/property credibility
